PROFILE

Frontend Engineer specializing in React and JavaScript, with production experience building performant, user-focused web applications. Improved load times for a fintech platform serving thousands of daily active users at KamelPay, and take pride in shipping interfaces that are both technically solid and genuinely easy to use.

WORK EXPERIENCE

Junior Frontend Developer, Kamelpay Karachi

JAN 2025- PRESENT

- Debugged and resolved 30+ UI bugs across multiple projects, improving visual consistency across the platform.
- Built foundational experience with HTML, CSS, and JavaScript through hands-on work on a live fintech product serving thousands of daily active users.
- Contributed to UI enhancements that improved user satisfaction scores by 15% on key product screens.

Web Developer Intern, Kamelpay Karachi

JULY 2024 - DEC 2024

- Built and optimized 20+ responsive React.js UI components, reducing average page load time by ~35% on high-traffic screens.
- Collaborated with design and backend teams to successfully ship 8+ new product features, directly impacting the experience of thousands of daily active users.
- Mentored 2 interns and led weekly code reviews covering 10–15 PRs per week, improving team code consistency and reducing review turnaround time.
- Maintained a sub-2% UI bug rate post-release across all owned components through proactive testing and QA collaboration.

PROJECTS

KamelPay – Fintech

- Built and optimized 20+ responsive React.js UI components across the payroll and payments dashboard, improving interface reliability and consistency.
- Reduced average page load time by ~35% on high-traffic screens through component-level performance optimization and efficient state management.

- Collaborated with designers and backend teams to deliver 8+ new product features, directly enhancing the financial access experience for expat workers across the GCC.
- Resolved 30+ UI bugs in production, maintaining a sub-2% post-release bug rate across all owned components.

Desert Safari [🔗](#)

- Engineered a full-stack booking platform serving 100+ concurrent users, backed by Firebase real-time database, authentication, and cloud storage.
- Built a custom admin panel for order and content management, cutting admin workload by 40%.

Techno Media [🔗](#)

- Architected and delivered a complete single-page application for an interior design and event management company

Silver Moon [🔗](#)

- Built conversion-optimised sections (testimonials, FAQ accordion, lead-gen form), achieving a 35% increase in form submissions.
- Structured content architecture around the No Collection, No Fee
- model to improve qualified-lead conversion rate.

Igloo [🔗](#)

- Developed interactive agency site with dynamic service showcases and client testimonials, achieving sub-2s initial load time

Cave Counselling [🔗](#)

- Developed an accessible WCAG-compliant mental wellness site featuring article blogs and an appointment booking flow

GetHikma [🔗](#)

- Built a performant blog platform with dynamic content rendering, category filtering, and a clean responsive reading interface.
